paraphrased from well-known chefs.

Bmw Z4 Engine Bay Layout

Bayerische Flugzeugwerke AG was formed in 1916. This company was renamed to Bayerische Motoren Werke (BMW) in 1922. However the name BMW dates back to 1913, when the original company to use the name was founded by Karl Rapp (initially as Rapp Motorenwerke GmbH). BMW's first product was a straight-six aircraft engine called the BMW IIIa, designed in the spring of 1917 by engineer Max Friz.

Interestingly, the new engine wasn't fitted to the 100 Series straight away when the 100 was launched in 1998, and it took another two years to get the 1HD-FTE into the Cruiser's engine bay. But when it arrived, it suddenly addressed all those earlier concerns about the 1HD-FT's lack of down-low torque and soft launch from idle.

series (it took serious modifications to the engine bay to make it fit). The engine was based on BMW's 4 liter V8 from the E34 540i.

56 of the Greatest Sports & Performance Cars of the 1990s

BMW is iterative in their chassis design, and part of the added weight of each new chassis is the added stiffness. The older, lighter, and more flexible E30 definitely needs a strut brace, which we know from the high number of racers with collapsing strut towers that are actually pushing together with age; a strut tower brace solves this!
