The Boeing 757, Boeing 767 and Boeing 777 all have two main landing-gear bogies—the structure under the wings with wheels attached. The Boeing 777 however, has three pairs of wheels on each bogie, while the 757 and 767 have two. The 777 above clearly shows the triple-wheel arrangement. 757 767 study guide - SlideShare

Boeing had to offer new aircraft, and developed the single-aisle 757, the larger, twin-aisle 767 upgraded versions of the 737. In April 1994, Boeing introduced the most modern commercial at the time, the twin-engine 777, with a seating capacity of approximately 300 to 370 passengers in a typical three-class layout, in between the 767 and the 747.

Boeing 757-767 Study Guide – pilotstudyguide.com

The Boeing 757 and 767 were developed simultaneously. Hence it is not strange that both aircraft have a lot in common. Look for example at the shape of the cockpit windows, tailcone and vertical stabilizer. However the Boeing 757 has a single aisle and a narrower fuselage, compared to the wide body Boeing 767.

The Boeing 757 is an American narrow-body airliner that was designed and built by Boeing Commercial Airplanes. The then-named 7N7, a twinjet successor for the 727 (a trijet), received orders in August 1978. The prototype completed its maiden flight on February 19, 1982 and it was certified on December 21, 1982. Eastern Air Lines placed the original 757-200 in commercial
