Rotax engines are known for power an reliability, but the approach Rotax uses seems a bit antithetical to the one used by most two-stroke manufacturers. Horsepower is a function of torque and engine rpm; if you have more rpm, you need less torque, and vice versa. So, the simplest way to increase horsepower is to run the engine at higher rpm.

How a seadoo rotax engine works

The Rotax 654 engine is generally considered bomb-proof. Many people will put more than 200,000 miles (320,000kms) on an engine before it needs any serious maintenance. As such, major engine failures (such as shown below) are very rare for the Rotax 654.
