Breaking The Spell Religion As
Breaking the Spell: Religion as a Natural Phenomenon is a 2006 book by the philosopher and cognitive scientist Daniel Dennett, in which the author argues that religion is in need of scientific analysis so that its nature and future may be better understood. The "spell" that requires "breaking" is not religious belief itself but the belief that it is off-limits to or beyond scientific inquiry.

As it stands, though, Breaking the Spell succeeds in getting its intended message across, and it does so in a manner that would not frighten off its intended audience--the average lay theist. Essentially, Dennett's main thesis is that we should take steps towards developing naturalistic theories as to religion's origin.
