During photosynthesis, they use the energy in sunlight to make sugars from carbon dioxide and water. In this way, the energy from sunlight and the carbon from carbon dioxide are stored in the sugars. The sugars created during photosynthesis can be used in four ways by the plant, as shown in Figure 4.22.

BSCS Biology: A Human Approach, Fifth Edition BSCS Biology An Ecological Approach Chapter 9: Evolution: Patterns and Diversity I felt like a blind man given sight. Charles Darwin speaking about his discoveries Introduction Living things have many similarities including development patterns, genetic codes, and patterns of body shapes and physical makeup.

BSCS biology : an ecological approach : Cairney, William J ...

BSCS Biology: An Ecological Approach, p. 82s. This passage provides an appropriate link between proteins doing the work of the cell and the need for the proper temperature and pH. This book explains that the work of enzymes depends on its fit with other molecules, thus if the shape is changed, its ability to do work is changed.
