Cadillac High Performance
Cadillac was the first automobile maker in the world to mass-produce V8 engines. [citation needed] The company has produced many generations and variations of V8s since 1914.In 2010, when the Northstar engine series ended production, it became the last General Motors division to retain its own proprietary V8 design.

Cadillac V8 engine - Wikipedia
The whole idea behind these large displacement engines was to allow for drivability found in 60's cars with pollution equipment and lower compression. The 472/500/425/368 all are very under taxed. They don't make a lot of soup for their size when compared to some other stuff. The power that they make is suitable for moving a heavy car.

HE500 Cadillac 500 CID TBI Conversion Kit - Howell EFI ...
Cadillac 500 / 472 Engine Identification. All the Cadillac Big Blocks are strong engines capable of producing huge amounts of street useable low RPM power. Of the four the 500 is by far the more popular with the 472 coming in a close second. To distinguish between these two can be difficult for someone new to Cadillac engines.

Cadillac 500 / 472 / 425 Engine Identification

Hopping up the 500 Cadillac - Crankshaft
For 1970, Cadillac increased the stroke to create an even 500 cubic inches (8.2 liters), initially as an Eldorado exclusive, producing 400hp and a massive 550-lbs ft of torque. Though the original plans for this engine family likely included even larger displacements, changes in fuel costs, emissions regulations, and other factors dictated that Cadillac engines would instead become smaller.
