FAQ. Q: Where is the color Brown? A: Brown (and I'm not referring to Seal Brown) is a somewhat ambiguous term used to identify a number of horse coat colors but most often refers to a dark variation of Bay. As the genetics behind the variations of the Bay base color become more understood, we will try to make changes to the calculator that will incorporate these variations.

Coat Color Calculator

Ticking and Roan. Photograph of Dunder submitted by Jessica Pilhede. Ticking is flecks or spots of colour on white areas. It can occur on any white area on a dog, so long as the white is "real" white (i.e. so long as it's caused by the >white spotting. series and not by the Intensity gene).. If a dog has the ticking allele but doesn't have any white areas, there will be no visible effect.

FAQ: Doods & Generations - Goldendoodles

Akitas come in a Baskin-Robins-like assortment of colors, including a few different brindle combinations.Robust dogs, Akitas were originally developed to track and hunt boar, bear and other dangerous animals. They have a willful mind and a protective instinct, so they require proper socialization and training to prevent them from becoming aggressive.

Labrador Retriever coat colour genetics - Wikipedia

The coat of the domestic dog (*Canis lupus familiaris*) refers to the hair that covers its body. A dog's coat may be a double coat, made up of a soft undercoat and a tougher topcoat, or a single coat, which lacks an undercoat.Double coats have a top coat, made of stiff hairs to help repel water and shield from dirt, and an undercoat to serve as insulation.
