Step 2 - Configure LDP on all the interfaces in the MPLS Core. In order to run MPLS you need to enable it, there are two ways do this. At each interface enter the `mpls ip` command; Under the `ospf` process use the `mpls ldp autoconfig` command; For this tutorial we will be using the second option, so go int the `ospf` process and enter `mpls ldp autoconfig` - this will enable mpls la
