For other formatting issues, we've covered everything you need to convert ebooks.

answer key Flashcards and Study Sets | Quizlet

This cell is in column D and row 5, so it is cell D5. The column always comes first in a cell reference. When you use cell references in a formula, in this case I am adding cells A2 and B2, Excel calculates the answer using the numbers in the referenced cells. When I change the value in a cell, the formula calculates the new result automatically.
