Whether it is a piece of fruit or an entire meal, all the food you eat is treated to the same processes in your body.As soon as food enters your mouth, or is

Chapter 14: The Digestive System and Body Metabolism

The circulatory system transports oxygen (from respiration) and glucose (from digestion) to muscles so that mitochondria in the muscle cells can produce energy by cellular respiration. The blood stream takes away carbon dioxide and keeps bringing a fresh supply of oxygen and glucose to where it is needed.
