Chapter 14 The Human Genome  
Biologists can analyze human  
chromosomes by looking at a  
karyotype. A karyotype is a  
picture of the chromosomes  
from a cell arranged in  
homologous pairs. Humans  
have 46 chromosomes. Two of  
these chromosomes, X and Y,  
are the sex chromosomes.  
Females have two X chromo-  
somes (XX). Males have one X  
and one Y chromosome (XY).
