(shortness of breath) and a diagnosis of asthma 2. Writes a diagnostic label of impaired gas exchange 3. Organizes data into meaningful clusters 4.

## Chapter 18 Basics Of Diagnostic Coding Answer Key

The concept of a diagnostic hierarchy implies that certain diagnoses should not be made when other are present. This approach contrasts with the DSM-based approach of making multiple diagnoses at the same time, which leads to the problem of comorbidity. A central aspect of taking a non-DSM approach to clinical psychopharmacology is the importance of tackling this "comorbidity" problem.
