Pharm chapter 44 Flashcards | Quizlet

Treating most hypothyroid patients with T4-only meds; offering no options. Dosing solely by the TSH and the total T4, or using the outdated "Thyroid Panel".

Hyperthyroidism - Wikipedia

The thyroid gland is a butterfly-shaped organ composed of two lobes, left and right, connected by a narrow isthmus. It weighs 25 grams in adults, with each lobe being about 5 cm long, 3 cn wide, and 2 cm thick and the isthmus about 1.25 cm in height and width. The gland is usually larger in women than in men, and increases in size in pregnancy.
