Immune Cells 6 basic groups of Leukocytes: 1. Eosinophils 2. Basophils (blood); Mast cells (tissue) 3. Neutrophils 4. Monocytes (blood), macrophages (tissue) 5. Dendritic cells 6. Lymphocytes (plasma, helper, cytotoxic & NK) Fig 24-4 APCs

Ch 24: The Immune System - Las Positas College

Chapter 24 The Adaptive Immune System Our adaptive immune system saves us from certain death by infection. An infant born with a severely defective adaptive immune system will soon die unless extraordinary measures are taken to isolate it from a host of infectious agents, including bacteria, viruses, fungi, and parasites.

Chapter 24 The Immune System And Disease Worksheet Answer ...

Chapter 24: The Immune System Innate Defenses Against Infection 24.1 Describe the nature of innate defenses in invertebrates and vertebrates. External barriers and internal defenses (phagocytosis – neutrophils, macrophages – NK cells – programmed cell death) 24.2 Describe the steps of the inflammatory response and explain how they help prevent the spread of disease.

Chapter 24 – Immune System | Vinatu

Components of the immune system constantly search the body for signs of pathogens. When pathogens are found, immune factors are mobilized to the site of an infection. The immune factors identify the nature of the pathogen, strengthen the corresponding cells and molecules to combat it efficiently, and then halt the immune response after the infection is cleared to avoid unnecessary host cell damage.

Chapter 24 The Immune System

your immune system to mount a defense because it has not been exposed to the pathogen before. Both are responses by your immune system to an invading pathogen. A stronger and more efficient immune response triggered by a pathogen that has previously infected you. 15. Refer to Figure 24.8B on page 493 of your textbook. How many days did it take for antibody
