### ATMOSPHERE TEST REVIEW ANSWER KEY!!!!

A temperature inversion is an increase in temperature with height in an atmosphere layer. On a clear winter night where there is a rapid cooling of land, the lower layers of the atmosphere lose heat to Earth's surface. As a result, the lower layers of air become cooler than the air above.

### Chapter 3 Section 2 ppt - SlideShare

THE TROPOSPHERE The troposphere is the layer of the atmosphere that we live in. It is where most of the water vapor, carbon dioxide, pollution, and living things on Earth exist. Weather conditions such as wind and rain all take place in the troposphere. The troposphere is also the densest layer of the atmosphere.

### Earth Science Chapter 11-The Atmosphere (Study Guide Answers)

Thickness of the Atmosphere Most of the atmospheric mass is confined in the lowest 100 km above the sea level. The thickness of the atmosphere is only about 2% of Earth's thickness (Earth's radius = ~6500km). Because of the shallowness of the atmosphere, its motions over large areas are primarily horizontal.
