**Class XII NCERT Biology Text Book Chapter 3  
Human Reproduction is given below As you are  
aware, humans are sexually reproducing and  
viviparous. The reproductive events in humans  
include formation of gametes (gametogenesis),  
i.e., sperms in males and ovum in females,  
transfer of sperms into the female genital tract  
(insemination) and fusion of male and female  
gametes (fertilisation) leading to ...**

**Human Reproduction | Oxford Academic**

**Human reproduction is any form of sexual reproduction resulting in human fertilization. It typically involves sexual intercourse between a man and a woman. During sexual intercourse, the interaction between the male and female reproductive systems results in fertilization of the woman's ovum by the man's sperm. These are specialized reproductive cells called gametes, created in a process called ...**
