compounds rearrange in chemical reactions. The symbol + separates reactants from one another and products form one another, while the symbol \rightarrow means produces. The Law of Conservation of Mass states that atoms do not get destroyed in chemical reactions, only rearranged.

Classifying Types of Chemical Reactions Practice Problems

This article describes a three week lesson plan for teaching stoichiometry using an algorithmic method. Two labs (one designed as a laboratory quiz) several cooperative learning exercises, student worksheets and guided instructional frameworks (forcing students to develop good habits in writing measures and doing problem solving) are included.
