FREE Chemistry: Balancing Equations | Teaching Resources
When balancing equations, remember chemical reactions must satisfy conservation of mass. Check your work to make certain you have the same number and type of atoms on the reactants side as on the products side. A coefficient (number in front of a chemical) is multiplied by all the atoms in that chemical.

A worksheet aimed at GCSE and A level chemistry students which focuses on balancing equations. The following premium resource for balancing equations is available in our shop which also includes worked answers:

What is balancing equations - Answers
When you find difficulty in balancing the equation in the balancing chemical equations worksheet, you can miss it with a fraction of $\frac{1}{2}$ and that will easily balance the equation. But the problem is that you cannot have a fraction for the co-efficient, this is why doubling all coefficients will help you balance the equation.
Proportion Method

How to Balance Equations - Printable Worksheets
Balancing Equations: Answers to Practice Problems 1. Balanced equations. (Coefficients equal to one (1) do not need to be shown in your answers).

49 Balancing Chemical Equations Worksheets [with Answers]
Instructions on balancing chemical equations: Enter an equation of a chemical reaction and click 'Balance'. The answer will appear below; Always use the upper case for the first character in the element name and the lower case for the second character.

Balancing Equations Chemistry Test Questions
Balancing equations is one of those iconic subjects that is synonymous with chemistry. Even if you have no idea what it means, you know that you'll be balancing equations at some point during your chemical education. Fortunately, balancing equations isn't all that hard to do. I mean, sure, there are numbers and formulas and stuff,...

Chapter 5 - Balancing Chemical Equations Worksheets (ANSWERS)

Balancing chemical equations is a math-like skill that can be achieved through repitious practice. Start out with simple chemical equation and gradually build to greater difficulty. Often students need to see the process many times until an 'ah-ha' moment occurs. I first teach the concept of balancing chemical equations (see video below).
