Finding the Ideal Cholesterol Ratio

Since the 2013 ACC/AHA cholesterol guideline, newer cholesterol-lowering agents (nonstatin drugs) have been introduced and subjected to RCTs. They include ezetimibe and PCSK9 inhibitors, and their use is limited mainly to secondary prevention in patients at very high-risk of new atherosclerotic cardiovascular disease (ASCVD) events.

Cholesterol Ratio Calculator | Cholesterol Levels

Cholesterol Risk Calculator - Medindia

The old cholesterol guidelines included a risk assessment tool, but it did not play nearly as prominent a role as the new risk calculator. The new tool is based on additional population-wide data, which has been another matter for debate (for instance, about whether the data, mostly from the 1990s, are representative of the general population today).
