Clipper (programming language) - Wikipedia

Clipper is een programmeertaal die vroeger veel gebruikt werd om programma's te maken onder het besturingssysteem DOS. Hoewel het algemeen gebruikt kan worden, diende het vooral voor het maken van databankprogramma's.. Geschiedenis. Clipper werd oorspronkelijk ontworpen als een compiler voor de (toen) erg populaire dBase-III-taal, waardoor programma's veel sneller werkten.

Clipper Programming Guide, Version 5.01 by Rick Spence Harbour is a computer programming language, primarily used to create database/business programs. It is a modernized, open sourced and cross-platform version of the older Clipper system, which in turn developed from the dBase database market of the 1980s and 1990s. Harbour code using the same databases can be compiled under a wide variety of platforms, including Microsoft Windows, Linux, Unix ...
