### Club Car Gas Engine Problems

The Club Car company -- a division of Ingersoll Rand -- manufacturers a wide range of gas- and electric-powered utility vehicles for on- and off-road use. If you run into problems with your gas-powered Club Car, such as the XRT1550, there are several steps you can take to avoid taking the vehicle to a repair shop.

### Troubleshooting Your Gas-Powered Golf Cart Motor ...

I have a 88 club car with a gas engine, my problem seems to be that once you run it a short distance and stop, then when you want to go it floods and will not start up until you pull the pulse hose of the fuel pump or kink off the gas line. It then take some cranking but will start up.

### Gas Powered Club Car Won't Start | SportsRec

I have a 96 Club car, gas (forgot to check what engine I have) I have had this for 4 years and never had a problem, until about 6 months ago Problem #1 it started about 6 months ago, you press the accelerator and its like a spinning/slipping belt noise, after about 5 seconds, it will crank/start. I have replace the belt, still the same thing

As a PTV, the Club Car Onward can be sold as a Gas or Electric Unit with or without a lift kit. The trend for the retail segment has been for lifted units as of late, so it made sense to offer this to consumers. On the Gas side, it uses a Subaru 404cc engine with 14.4 HP which is adequate for its determined speed and usage.

SOLVED: Fuel system flow problem. Engine will not start ...

Fill the fuel tank with 1 gallon of gasoline to get the Club Car to start. Change the air filter inside the Club Car. This is located next to the engine. Use your fingers to pull the air filter out of the housing. Replace the air filter with a new one and try to start the Club Car. Dirty air filters can block the oxygen intake on the engine.

### How to Troubleshoot a Gas Club Car | It Still Runs

If it gets too dirty it can cause your engine to not get enough air and stall out. Check the oil level and make sure you have enough and that the color is light and not black. If the oil is blackened or dark, you need to change it. Get a new oil filter and enough oil to refill the engine. Drain the oil through the plug on the oil pan underneath.
