constituted the primary function of every pharmacist and was considered a standard of practice.

Compounding Sildenafil Oral Solution

One study involved compounded sildenafil citrate in a citrate-buffered solution (0.1 M, pH 4) and either a syrup excipient (resulting in a suspension) or a sugar-free syrup excipient (resulting in a solution); both had pH values of approximately 4.2. Both the suspension and the solution were slightly pink and fruit-flavored.
