I don't have any shop time on the 3306 but Cat pumps last a long time. First thing I would check after trying a straight pipe is make sure return fuel line is open. Then check Injectors. I know somebody pulled the head off a Cat engine with the Injectors still in and messed the tips up. If this engine

I think they are usually specific to the brand/type of test kit that you buy. I haven't done many compression tests but 500-600 is about the most I've seen/heard of. Some diesel engine manufacturers, like Cummins, don't provide compression numbers for diagnosing engine health but will use inches of blow-by measured by a manometer gauge.

Click to download CAT 3306 industrial engine spec sheet - 6 pages This document is quite unique among spec sheets because it shows fuel consumption in scientific terms as well as in humanly understandable terms. e.g. lb/hp hour is shown in gal/hour as well. I have not seen this in anybody's engine spec sheets before.
