Chapter 2 Properties of Matter Section 2.2 Physical Properties (pages 45 – 51) This section discusses physical properties and physical changes. It also explains how physical properties can be used to identify materials, select materials, and separate mixtures. Reading Strategy (page 45) Building Vocabulary As you read, write a definition for each ...

Chapter 2 Properties of Matter Section 2.3 Chemical Properties

A physical property is a characteristic of matter that can be observed and measured without changing the chemical identity of the sample. The measurement of a physical property can change the arrangement of matter in a sample but not the structure of its molecules.

Concept Review with Key Terms . 12.1

Some Types of Solutions—Many types of solutions can be formed by dissolving one substance (the solute) in another substance (the solvent). Solutions can be formed from all three states of matter (solid, liquid, and gas) and in various combinations.

1.3 Physical and Chemical Properties –
Chemistry

Both extensive and intensive properties are physical properties, which means they can be measured without changing the substance ' s chemical identity. For example, the freezing point of a substance is a physical property: when water freezes, it ' s still water (H_2O)—it ' s just in a
