Last January, I replaced the port engine risers on my 1997 405 with 454 Xli's and the boat ran great all year. Last week, I turned the engines over which is regularly done and quickly noticed a heated paint smell as the port engine warmed up. A check of the risers found the inboard side of the port riser extremely hot.

The engines are Crusader 454's into V drives, not I/O. These are not formerly point type distributors. No luck today...We re-check and cleaned all of the ground connections from the coil bracket, and the main wiring harness ground to the block. The engine started right up off of the ignition key at the upper station.
