A grout curtain is a type of foundation grouting used on dams. A series of holes is drilled in multiple rows along the base of the dam. Grout is injected into these holes to form a waterproof curtain.

# Where To Download Dam Foundation Grouting Revised Expanded Edition

This prevents water seepage through the base of the dam, which can damage the dam's integrity.

grouting (Book,  
2007) [WorldCat.org]

Pressure grouting or  
jet grouting involves  
injecting a grout  
material into  
otherwise  
inaccessible but  
interconnected pore  
or void space of which  
neither the  
configuration or  
volume are known,  
and is often referred

proven methodology  
for installing up-  
gradient and down-  
gradient barriers in  
dam foundations. In  
this application, these  
barriers are often  
called grout curtains.  
This technique is  
employed where the  
rock formation  
beneath the existing  
or proposed dam  
foundation is so
