Data Bell Chiming Bell Sound
A standing bell or resting bell is an inverted bell, supported from below with the rim uppermost.Such bells are normally bowl-shaped, and exist in a wide range of sizes, from a few centimetres to a metre in diameter. They are often played by striking, but some—known as singing bowls—may also be played by rotating a mallet around the outside rim to produce a sustained musical note.

Chingling is a yellow, spherical Pokémon similar to a bell. It has stubby arms and legs, as well as beady, black eyes. On either side of its mouth is a large, black spot. Inside its mouth is a red orb, which creates a ringing sound as the Pokémon moves.

DIY Chime Design and Build - DIY Biomass and Chime Design
This handcrafted steel bell features a green sand-textured finish. Hang your Heroic Windbell in a breezy spot and let it play in the wind. We tone our bells to unite two important ways the instrument vibrates. One is the sound of the bell itself and the other is the hollow chamber inside the bell that acts like an organ pipe.
