*Demystifying Drug Dosing in Obese Patients*

*Obese patients when dosed by TBW experience higher daptomycin exposure compared with their nonobese counterparts. 73 Given the relatively wide therapeutic index of daptomycin and clinical experience of tolerability as well as data supporting the use of higher daptomycin doses (up to 10–12 mg/kg) for adequate PK/PD target attainment, dosing obese patients with ABW 0.4 is reasonable to ensure treatment efficacy while balancing the risk of muscle toxicity. Close monitoring is required because ...*
