Design for Pediatric and Neonatal Critical Care ...

Intensive care units (ICUs) are specialist hospital wards that provide treatment and monitoring for people who are very ill. They're staffed with specially trained healthcare professionals and contain sophisticated monitoring equipment. ICUs are also sometimes called critical care units (CCUs) or intensive therapy units (ITUs).

Critical care usually takes place in an intensive care unit (ICU) or trauma center. Monitors, intravenous (IV) tubes, feeding tubes, catheters, breathing machines, and other equipment are common in critical care units. They can keep a person alive, but can also increase the risk of infection. Many patients in critical care recover, but some die.

STANDARDS FOR INTENSIVE CARE UNITS - UCLouvain

There are approximately 94,000 ICU beds in the 6,300 ICUs that are used to care for the critically ill in the 3,200 acute-care hospitals of the United States.^{1, 2} Intensivists are frequently asked to participate in efforts to design new ICUs or renovate old ones. The primary goal of this three-part series on innovative designs for the smart ICU is to help intensivists fully
