Can anyone give me some advice on how I can re-programme a Seat key fob? I recently changed the batteries in the fob and now the remote central locking doesn't work. I've read a few posts on how this is done on Fords but I was wondering if anyone knew what the procedure is for Seats I'm guessing it might be similar to VW cars?

### Central Locking - Car Terms | SEAT

• Repeated operation of the central locking will deactivate the central locking button for 30 seconds. Once this time has passed, the button may be used once more. • There is a danger that the key may remain inside the vehicle, if the vehicle is locked using the central locking button when the driver's door is closed and, for example, the passenger door open.
