The purpose of Verilog HDL is to design digital hardware. Data types in Verilog are divided into NETS and Registers. These

# Online Library Digital Design Verilog Solution

data types differ in the way that they are assigned and hold values and also they represent different hardware structures. The Verilog HDL value set consists of four basic values:

The counter is a digital sequential circuit and here it is a 4 bit counter, which simply means it can count from 0 to 15 and vice versa

## Online Library Digital Design Verilog Solution

based upon the direction of counting (up/down).. The counter ("count") value will be evaluated at every positive (rising) edge of the clock ("clk") cycle. The Counter will be set to Zero when "reset" input is at
