DIN 1026

DIN 1026-1. Part one defines the family of the so-called UNP channels, or UPN channels in steel. These channels have

Online Library Din 1026 En 10279

conical internal flanges. There are 27 sizes in a range from size 20 to 400 millimetres height. The norm that defines the product tolerances is the EN 10279. DIN 1026-2. Part two defines the family of so called UPE channels in steel.

Revision of DIN 1026 was prompted by publication of DIN EN 10279, which specifies tolerances on dimensions, form and mass for hot-rolled steel channels with taper and parallel flanges.

Amendments This standard differs from the 1963 edition as follows:

- a) The standard now consists of two parts.
