What is dried fruit? The key to getting the most nutritional benefit from dried fruit is choosing the right type. Most traditional dried fruits are made by removing the water from the fresh fruit. The result is simply a dried version of fresh fruit, with no extra sugar or other ingredients added 2.

Dried Fruit Food And Agriculture

There are two main forms of dried fruit- semi-moist and dried fruits. Semi-moist fruits, such as grapes contain naturally high levels of sugar which means they can be preserved with a higher moisture content than most other dried fruits. Semi -moist fruits can have a moisture content as high as 25% and are consumed as they are without rehydration.
