Honda CR-V 1.6 i-DTEC 4WD: Living with it
The 1.6 litre i-DTEC engine is the first evidence of Honda's 'Earth Dreams Technology' project. The name might be fluffy but the benefits are tangible. Honda started with a blank piece of paper and ended up with the lightest engine in its class, with 40% less friction than the 2.2 i-DTEC, and matching petrol units, which contributes to great fuel economy and increased responsiveness.

of torque at 2,000rpm. Which means, combined with the auto gearbox, 0-100km/h is reached in 11 seconds, with the ability to push on to a top speed of 124mph. Honda's 9-speed auto has a wide spread of gears to enable fuel efficiency of 4.1l/km.

Honda CR-V 1.6 i-DTEC Review | TestDriven
Of course the big advantage of the 1.6 i-DTEC engine is economy. As it is front wheel drive and considerably lighter, it means better fuel consumption - up from 50.4mpg in the 2.2 i-DTEC to 62.8mpg in the 1.6 i-DTEC. CO2 is much lower too meaning cheaper annual car tax
