Project Management Software | Microsoft Project

Successful project managers use dynamic project scheduling because it saves them significant amounts of time. It also lets them quickly model the impact of changes to resources, work or costs. Dynamic scheduling automatically recalculates the duration and budget for the project every time you make a change in the resources, hourly rates, hours of work and predecessor relationships.

Forecast Scheduling | MPUG

Highly dynamic schedules are always built using the full functionality of a project management software tool such as Microsoft® Project. There is just no way to get around it. Managing the current status of all the activities, maintaining the interdependencies, and calculating the estimated completion date on a weekly basis can only be accomplished with these tools.
