cylinders and is totally different from previous versions of M54B30. It is equipped by popular Double-VANOS camshaft and light-weight aluminum-magnesium block of cylinders, another crankshaft and lighter connecting rods and pistons.

### Starter Replacement On N51/N52 Engines - FCP Euro

The N52 engine was assembled with two different valve covers, depending on the year and the model of the E60 5 series. As a general rule of thumb, all U.S. delivered 525i and 530i models (which switched to the N52 engine around October of 2004) were delivered with a lightweight magnesium valve cover with single use aluminum bolts anchoring it to the engine head and a metal gaskets.

The intake manifold on BMW E90 and  
E60 cars with normally aspirated NG6  
(new generation) N51 engines are  
equipped with a standard non-variable  
intake manifold. These engines have the  
same displacement as the N52 engines,  
but are designed with stricter emission  
standards in mind.

E60 N52 Engine Oil separator and other issues | Bimmerfest BMW

The BMW N52 is a straight-6 DOHC piston engine which was produced from 2004-2015. Compared with its M54 predecessor, the N52 features variable valve lift (called Valvetronic by BMW), a lighter block due to the use of a magnesium alloy and an electric water pump and a variable oil pump.

BMW 530i engine for sale - May 2020

On the E60 chassis, with the N54 engine, we can access the sensor with relatively minimal disassembly. It's a tight fit, but the sensor is accessible while working from underneath the hood. The location is the same on the N52 and N55 engines, and depending on the chassis, more or less components may need to be removed in order to gain access.
