chloroplasts in its cells is probably. a. a heterotroph b. an autotroph c. an herbivore d. a primary consumer, What property of water allows someone to fill a glass slightly above the rim without the water flowing over? a. specific gravity b. capillarity c. opacity d. surface tension, The spaces between neurons ...

### TEAS Test Science Questions Flashcards | Quizlet

The Earth's atmosphere exerts pressure on the surface. Pressure is measured in hectoPascals (hPa), also called millibars. Standard pressure at sea level is defined as 1013hPa, but we can see large areas of either high or low pressure. These areas are all relative to each other, so what defines a high will change depending on the area around it.
