Ebola (Audiobook) by David Quammen | Audible.com

Ebola Virus Disease (EVD) is a rare and deadly disease most commonly affecting people and non-primates (monkeys, gorillas, and chimpanzees). Ebola virus was first discovered in 1976 near a river in what is now the Democratic Republic of Congo. Ebola virus spreads to people through direct contact...

Books similar to Ebola: The Natural and Human History of a ...

It tracks down the causes of Ebola and how it may have spilled over in the human population. I wholeheartedly recommend this book to people that are into conspiracy theories, because even though the author follows a natural event, it seems like nature and evolution are conspiring against the human race, haha.

Ebola: The Natural and Human History of a Deadly Virus ...

Like Ebola virus disease, to give it its proper name — and not Ebola hemorrhagic fever, as it was known, since not all victims "bleed out," as Richard Preston unforgettably described the disease's effects in The Hot Zone — humans are masters of disruption, which may be why Africa is a continent's nursery for emerging viruses. The continent's high biological diversity and (relatively) undisturbed landscape is ripe to release a storehouse of unknowns, among them pathogens ...
