Section Review 1.4 Complete the following. 1. What is the biosphere? 2. How thick is the biosphere? 3. a. In what range of the biosphere does most life on Earth exist? b. Why is life usually not found beyond this range? 4. List three materials that organisms obtain from the biosphere. a. b. c. 5.

Understandings of Consequence Project - www.cfa.harvard.edu/

Recycling in ecology is regulated to a large extent during the process of decomposition. Ecosystems employ biodiversity in the food webs that recycle natural materials, such as mineral nutrients, which includes water. Recycling in natural systems is one of the many ecosystem services that sustain and contribute to the well-being of human societies.
