Introduction: The main reason for doing earthing in electrical network is for the safety. When all metallic parts in electrical equipments are grounded then if the insulation inside the equipments fails there are no dangerous voltages present in the equipment case. If the live wire touches the grounded case then the circuit is effectively shorted...

Preventing Suicide : Reaching out and saving lives is the International Theme for World Suicide Prevention Day, 10th September 2015.. It is a myth that "people who talk about suicide do not do it". And it gives us great joy to remember all those situations where people have chosen to ignore this myth.

What is Earthing | Electrical Notes & Articles
Types of Neutral Earthing in Power Distribution: Introduction: In the early power systems were mainly Neutral ungrounded due to the fact that the first ground fault did not require the tripping of the system. An unscheduled shutdown on the first ground fault was particularly undesirable for continuous process industries. These power systems required ground detection...

Electrical resistivity (also called specific electrical resistance or volume resistivity) is a fundamental property of a material that measures how strongly it resists electric current.A low resistivity indicates a material that readily allows electric current. Resistivity is commonly represented by the Greek letter ρ (rho). Electrical conductivity or specific conductance is the reciprocal of ...
