### Guide number - Wikipedia

If we don't actually meter the flash, then guide numbers can solve distance computation easily (for direct flash). Guide numbers have been calculated forever, at least since first commercial flash bulb about 1930. Guide number was the only system before light meters and electronic automation.

### A Guide to On-Camera Flash | B&H Explora

Keep in mind that the GN is given for a specific zoom setting on the flash-head. Zooming from wide to tele on our flash, changes the Guide Number! The spec for the Nikon SB-910 speedlight is given as: Guide number of 34/111.5 (at ISO 100, m/ft., 35-mm zoom head position, in FX format, standard illumination pattern) for high flash output volume

### Tutorial: How to use the guide number of your flash - Tangents

The same flash at 20 feet, for example, would use an aperture of *f*/4 (80÷20=4). I suppose the argument can be made that automatic flash and TTL metering have rendered guide numbers almost obsolete. In the early days of electronic flash, there was no such thing as TTL metering. Everything was manual.

### Understanding Camera Flash Guide Numbers, plus GN Calculator

Fast flash durations come at a cost, however, both in price and in [power] for lack of a better word. A flash's power is determined by its Guide Number, with low Guide Numbers (GN) indicating a weak or less powerful flash than one with a high GN. For ease of comparison, most flash GNs are rated for an ISO 100 film.
