Elementary Differential Equations - Pearson
This book will tell you everything you need to learn on differential equations. It covers thoroughly the methods for solving first and second order differential equations. The book also extends into Fourier transforms. I used this book at MIT for the differential equations class and found it very useful.

Amazon.com: elementary differential equations solution manual
A function whose derivative equals itself, and hence a solution of the differential equation $y' = y$ is $y(x) = e^x$. We reason that if $y = kx^2$, then each term in the differential equation is a multiple of x^2 . The choice $k = 1$ balances the equation, and provides the solution $y(x) = x^2$.
