Machine learning (ML) is the study of computer algorithms that improve automatically through experience. It is seen as a subse of artificial intelligence. Machine learning algorithms build a mathematical model based on sample data, known as "training data", in order to make predictions or decisions without being explicitly programmed to do so.

Encyclopedia of the Sciences of Learning | Norbert M. Seel ...

Machine Learning is a significant element of AI and is so popular that is sometimes confused with Artificial Intelligence. In spite of this huge emphasis on machine learning, the key driver for the growth of AI is actually Deep Neural Networks (DNNs). These networks display the ability of learning patterns of video, image and speech in a much more automatic and faster manner. They enhance the ...
