Cylinder Compression Testing Procedure - Matthews Volvo Site

How did you do the compression check? Cold engine or normal operating temp? Dry or wet test? Your #'s are low but it depends on how it was done. For example, my #'s, checked correctly were 190-200 across the board on a 200+k motor which is excellent. A blown head gasket usually will show a sharp difference on 2 adjacent cylinders, from the others.
