INVENTOR 2017 - ASSEMBLY ENGINE - SIMULATION

Invented an efficient internal combustion engine. Although little known, Nikolaus Otto is an inventor we should remember every time we get into our cars. Before there was Karl Benz or Henry Ford, there was Nikolaus Otto. Otto spent his early years as a traveling salesman, but later became a successful engineer.

Invention of the Car: A History of the Automobile

The earliest known rudimentary steam engine and reaction steam turbine, the aeolipile, is described by a mathematician and engineer named Heron of Alexandria (Heron) in 1st century Roman Egypt, as recorded in his manuscript Spiritalia seu Pneumatica. Steam ejected tangentially from nozzles caused a pivoted ball to rotate.

Frank Whittle, Air Commodore Sir Frank Whittle, OM, KBE, CB, FRS, FRAS (1 June 1907 – 9 August 1996) was a British Royal Air Force air officer. He is credited with single-handedly inventing the turbojet engine. A patent was submitted by Maxime Guillaume in 1921 for a similar invention; however, this was technically unfeasible at the time.

Biography of Rudolf Diesel, Inventor of the Diesel Engine

Rudolf Diesel, who is best known for the invention of the engine that bears his name, was born in Paris, France in 1858. His invention came while the steam engine was the predominant power source for large industries. Figure 1. Rudolf Diesel (1858-1913)

The History of Steam Engines

The first commercially successful engine that could transmit continuous power to a machine was the atmospheric engine, invented by Thomas Newcomen around 1712. [b] It improved on Savery's steam pump, using a piston as proposed by Papin. Newcomen's engine was relatively inefficient, and mostly used for pumping water.

Early History of the Diesel Engine

In 1698 Thomas Savery patented a pump with hand-operated valves to raise water from mines by suction produced by condensing steam. In about 1712 another Englishman, Thomas Newcomen, developed a more efficient steam engine with a piston separating the condensing steam from the water.

Who invented the first internal combustion engine - Who ...

The engine that bears his name set off a new chapter in the Industrial Revolution, but German engineer Rudolf Diesel (1858-1913), who grew up in France, initially thought his invention would help small businesses and artisans, not industrialists. In truth, diesel engines are commonplace in vehicles of all types, especially those that have to pull heavy loads (trucks or trains) or do a lot of work, such as on a farm or in a power plant.

In 1794 Thomas Mead patented a gas engine. Also in 1794 Robert Street patented an internal combustion engine, which was also the first to use the liquid fuel (petroleum) and built an engine around that time. In 1798, John Stevens designed the first American internal combustion engine.

History of the internal combustion engine - Wikipedia

Thomas Savery was an English military engineer and inventor. In 1698, he patented the first crude steam engine based on Denis Papin's Digester or pressure cooker of 1679. Savery had been working on solving the problem of pumping water out of coal mines when he came up with an idea for an engine powered by steam.
