Instruction Sheet HIGH PRESSURE OIL PUMP International ...

The 244 code problem is between engine and trans and will not cause the engine to quit. The 543 is a code that will cause the Check Engine light to come on and engine may not run. This code is set when the main ecm cannot communicate with the IDM, (injector drive module). You have a 3 box system on your engine.

Diesel and Natural Gas Engines | Cummins Inc.

These engines were used by IHC for some heavy-duty applications until 1935, although their own large engines (525 cu in (8.6 L) FBD and 648 cu in (10.6 L) FEB) had appeared in 1932. The medium-duty 1930 A-series trucks received the all-new 278.7 cu in (4.6 L) FB-3 six-cylinder engine, with overhead valves and seven main bearings.

T444E vs. DT466 - School Bus Fleet Magazine Forums

If your tach shows some kind of rpm when cranking your ECM is powered and working. If you crank for over 30 seconds and still won't start and you get a check engine light, chances are the high pressure oil system has a fault. If you don't have a check engine light then it would be a fuel problem.
