I am new to the CAD management game. I have been handling customizations, setups, troubleshooting etc. at my company since about the time I started a year and a half ago and was recently asked to write a CAD standard manual. I have a pretty good idea about what should be in there and what I would like to see in there, but would like a couple to look at as templates for writing and organizing ...

I don't know of any good manuals. We have most of the ASME Y14 standards and while they define specifications well enough, they are not easy to follow nor do they cover all one might want in terms how drawings might be done. We also have GE's Modern Drafting Practices and Standards Manual, which seems to cover everything. It is not a standard ...
