Structural engineering is a sub-
discipline of civil engineering in
which structural engineers are
trained to design the 'bones and
muscles' that create the form and
shape of man made structures.
Structural engineers need to

understand and calculate the stability, strength and rigidity of built structures for buildings and nonbuilding structures. The structural designs are integrated with those ...

my Statics ch5 - SlideShare
Kinematics is a branch of classical mechanics that describes the motion of points, bodies (objects), and systems of bodies (groups of objects) without considering the forces that cause them to move. Kinematics, as a field of study, is often referred to as the "geometry of motion" and is occasionally seen as a branch of mathematics.
