Students who complete the Engineering Physics program will earn a B.S. in Engineering Physics from the College of Engineering. The physics and math requirements for this program are similar to those of the B.S. in Physics, but in addition to those requirements, students take 27 credit hours of engineering courses. The engineering courses a student takes will come from one area of engineering ...

Engineering Physics Problems

Engineering is the application of scientific knowledge in order to design, build, and maintain structures, machines, devices, systems, materials and processes. Engineering is often used to develop and create new technology. Many real world problems are sufficiently complex such that an engineering approach is required to solve them.
