Data Center Facilities Design and Implementation Bring your data centers to life. Our turnkey services can be the prime integrator and manage the entire solution, or we can collaborate in partnership with a general contractor.

Be Aware of These 5 Data Center Trends in 2018 | Data ...

Although data center designs are unique, they can generally be classified as internet-facing or enterprise (or “internal”) data centers. Internet-facing data centers usually support relatively few applications, are typically browser-based, and have many users, typically unknown. In contrast, enterprise data centers service fewer users, but host more applications that vary from off-the-shelf to custom applications. Data center architectures and requirements can differ significantly.
